NEWGEN
EVENT STUDIO

Where every event begins

NEWGEN Event Studio was founded in 2018 with one conviction: a celebration should look, on the day, exactly as the family imagined it.

Before Newgen was a company, **Mohan A** spent many years in the event decoration trade - starting with garland supply and rental work, learning the craft from the ground up. By the time he founded Newgen, he had a rule: no brief goes to production without a hand-drawn concept, sketched in front of the client, reviewed and approved before a single flower is ordered.

That sketch is still how every **NEWGEN** event begins.

1,500+ events later, across Chennai, Tiruchi, and Bengaluru, the scale has changed. The process has not.

The crew arrives before the first guest and leaves after the last chair is stacked. Trained on a common **execution checklist** built by Mohan himself, deployed across all three cities.

Three things that hold across every event

Guest experience, not just camera angles...

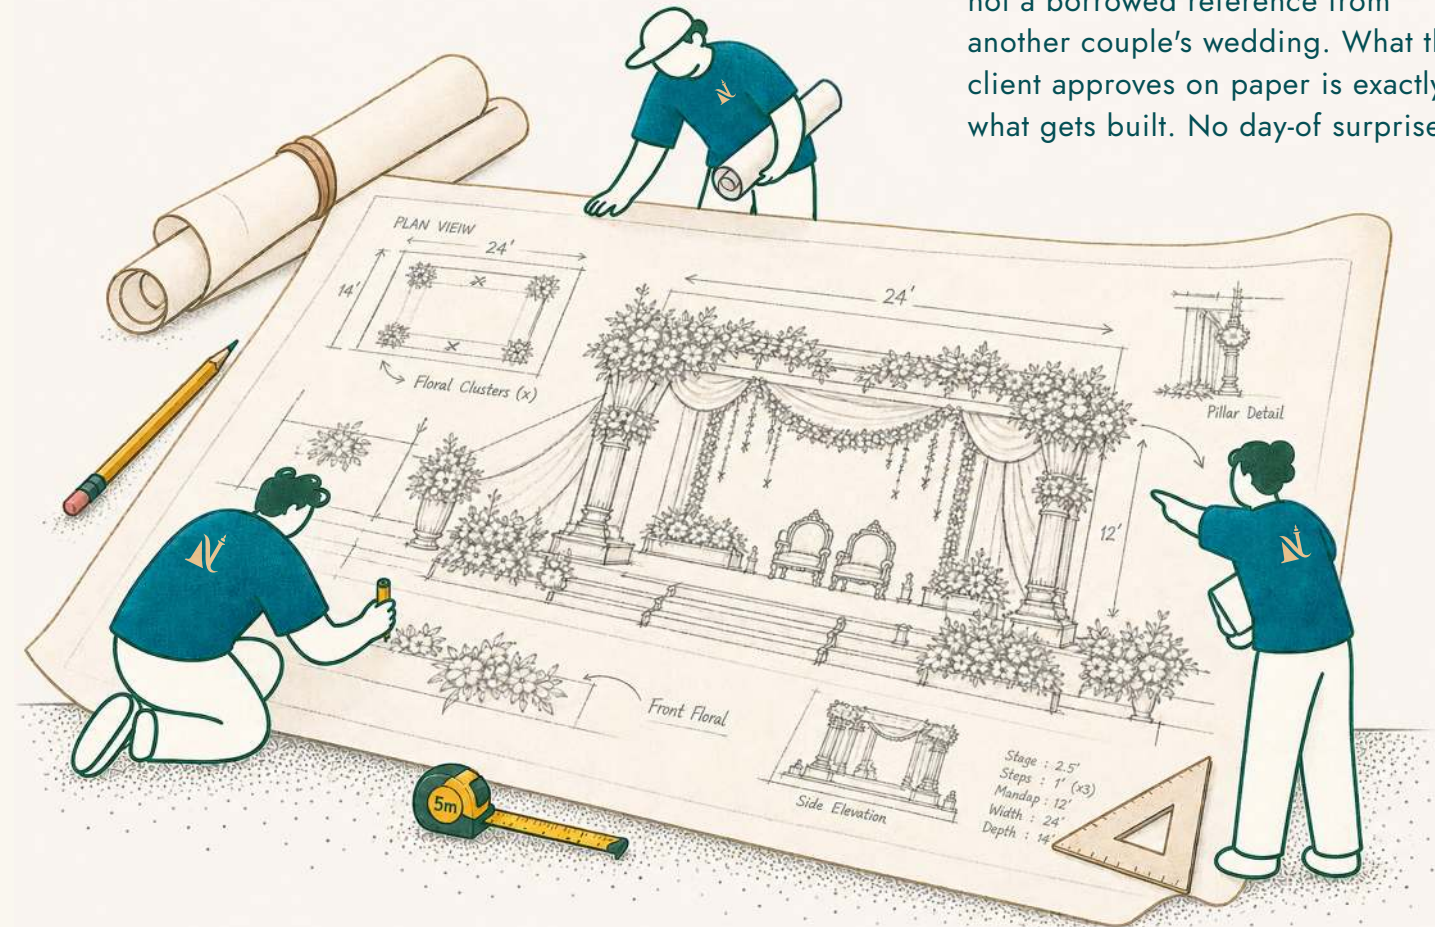

The test of a good setup is how it feels when 800 people walk in, not how it photographs from the front row. Newgen builds for the room, not the reel.

One team, full scope

Décor, AV, sound, photography, videography, catering coordination, and family ceremony logistics - all under Newgen. One point of contact. No gap between vendors. No handoff failures.

Sketch before Production

Every event starts with a **hand-drawn** concept. Not a stock mood board, not a borrowed reference from another couple's wedding. What the client approves on paper is exactly what gets built. No day-of surprises.

THE CHENNAI E

Chennai Decorator Sets New Standard with Eco-Friendly Wedding

Newgen Event Studio delivers sustainable celebration with locally sourced materials and zero-waste setup

Special Correspondent | Chennai Edition

In what is believed to be a first for the Chennai wedding decoration industry, Newgen Event Studio recently completed a fully eco-friendly wedding reception in the city. The setup used only locally sourced floral arrangements, eliminating the need for imported blooms that typically account for a significant portion of wedding waste. The venue was returned in pristine condition following the event, with all organic materials composted on site.

Founder Mohan A, who conceptualises every event through hand-drawn sketches before a single flower is ordered, said the eco-friendly approach required additional planning but no compromise on visual quality. The wedding, held at a premium Chennai mandapam, drew attention from guests and venue management alike for its lush yet sustainable aesthetic. Newgen Event Studio is based in Pallikaranai, Chennai.

*The only Chennai decorator with a verified **eco-friendly** wedding on record.*

"As soon as we saw the wedding venue, Mohan had ideas for the backdrop. He showed us a sample and produced exactly what we wanted. His team got our venue decorated and ready on time."

Anusha Srikanthan - Sangeet, Chennai

"The decoration was elegant, beautifully executed, and exactly how we envisioned it. From the stage setup to the floral arrangements, everything added a special charm to the occasion."
